**Re: Monthly Report of Incidents Reportable under FIFRA 6(a)(2)
Products Registered to United Industries Corporation
For the Month of January 2013**

Dear Sir or Madam:

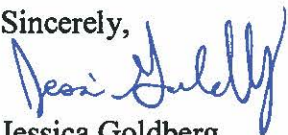

This submission is intended to provide EPA with additional information we have received since our last monthly report regarding reportable incidents involving pesticide products registered to various divisions of United Industries Corporation.

The enclosed report includes those incidents that are required to be accumulated for 1 month and then submitted to the Agency within 1 month of the end of that period.

I have enclosed a Summary Sheet of Reportable Incidents that includes all reportable incidents falling within the one-month accumulation category. This sheet provides the Case Number, EPA Registration Number or Active Ingredient, and Severity Category. The detailed Case Report, which includes all the information regarding each incident, is then attached immediately following the Summary Sheet.

If you have any questions, suggestions, or would like to discuss this report in more detail, please contact me at 314-683-2438 or via E-mail at jessica.goldberg@spectrumbrands.com.

Sincerely,

Jessica Goldberg
Regulatory Affairs Specialist

S.

Caller transferred by customer service rep: Kristin

Caller stating that 2 weeks ago she was spraying under a cabinet and some may have sprayed back in her face. She was also gasping for air, but it resolved. One and a half weeks ago she started noticing that she was getting boils that had puss pockets at the top. She has 3 on her lower stomach, one on her inner thigh and one under her right arm. She has started taking Clonidine which was causing her to break out in purple spots before the exposure occurred. She thinks sx's may be related to the medication.

GH:high blood pressure Meds: clonidine NKA

Caller: [REDACTED]

Patient Name: [REDACTED] Age:86 Years Gender:Female

O.

gasping for breathe:resolved

boils that have puss pocket on top

Symptoms: Other Other

A.

Acute adult dermal/inhalation exposure: SX

Exposure: Hot Shot Ant & Roach Plus Germ Killer (Hot Shot Ant & Roach Plus Germ Killer Fresh Floral)

R.

PC advised caller to seek medical attention. PC advised caller that her sx's are unlikely to be related to her sx's.

Caller is going to see her doctor tomorrow for sx's.

CB to pc with any further questions or concerns.

Therapies: Antibiotics (topical)(Performed), antibiotic salve
